

January 24, 2013

As a parent of grown children who are responsible drivers, I would like to support the bill that would increase funding for driver's education. Both of my children were able to take the training which has benefited them throughout their lives, keeping their insurance rates "doable" as well allowing them to lead productive lives.

I would like this service provided to all children at a reasonable rate, thinking of all of the young drivers that cause accidents because of their lack of training. Not being able to afford a class affects not only them, but also all drivers that are on the roads. I also feel it would be important to approach the insurance companies about contributing financially to support the program which would lead to reduced crashes thus affecting their bottom line.

Thanks for listening to me and good luck in your endeavors!
